JOB DESCRIPTION

You will be part of Beertec's technical project team for processing orders. Focused on coordination and execution of technical procurement operations for the brewing and beverage industry.

Working within the technical procurement, you will provide specialist and detailed technical knowledge of the equipment, materials and supplies used in the industry and you identify that sell such.

You will report directly to Beertec Head of Process Engineering and you are responsible for:

- » Creation of technical specifications, request for quotes
- » Compare and recommend supplier quotes / Cost analysis
- » Independent execution of all procurement operations taking into account price developments, delivery time, logistic and quality
- » Lead negotiations and secure advantageous commercial agreements with approved suppliers
- » Oversee supplier order till delivery / completion
- » Internal procurement process definition and standardization
- » Develop technical, statistical and fundamental assessments for each commodity
- » Market Research (industry trends & benchmarking and toolmaker mapping)
- » Reporting and support to the project team

QUALIFICATION

- » Bachelor Degree in Process / Mechanical Engineering, Industrial Engineering or equivalent

KNOWLEDGE / SKILLS / ABILITIES

- » Experience in strategic purchasing as well as experience in negotiation and contract design
- » Experience in an industrial company, especially in the field of mechanical and process engineering
- » Knowledge in process engineering for the brewing and beverage industry
- » High negotiation skills
- » Fluent in German and English, Spanish preferred

- » Ability to quickly recognize and analyze technical context, functionalities and interdependencies
- » Ability to work independently and take full responsibility, good communication skills
- » Stress Tolerance – Maintaining a calm and positive attitude during stressful situations
- » Strong team player with well-developed social and intercultural communication skills
- » Multitasking between two to three primary projects at a time

ADDITIONAL EXPERIENCE DESIRED

- » Understanding of the brewing process
- » Experience with MS-office

OUR OFFER

- » We offer exciting, global project activities together with a dynamic, innovative and young team
- » Modern workplace and a permanent contract
- » Flat hierarchies
